## Erratum Notice

### Chemical Agents and Carcinogens Code of Practice 2021

The following errata post publication of the Code were noted:

Page	Errata	Correction																		
12	Entry for asbestos: Misalignment of limit values of 0.1 fibres/cm <sup>3</sup> of air sampled under both columns for Occupational Exposure Limit Value (8-hour reference period) and Occupational Exposure Limit Value (15-minute reference period)	Alignment will be rectified in next iteration of the code.  The limit value of 0.1 fibres/cm <sup>3</sup> of air sampled relates only to the 8-hour reference period column.																		
17	The entry for Sulphuric Acid should make reference to Sulphuric Acid <i>mist</i> and also refer to footnote 9 in Commission Directive 2009/161/EU	The entry for Sulphuric Acid will be updated in the next iteration of the code to <u>Sulphuric Acid mist</u> and will make reference to the <i>mist being defined as the thoracic fraction</i> for sampling purposes.
